Model Erasure

Compliance you can prove, on any open
transformer.

€20M / 4%

Potential Fines for Non-Compliance

The EU AI Act enforces significant penalties for non-compliance, imposing fines up to **€20 million or 4% of global turnover**, emphasizing the urgency of compliant model erasure solutions.

Find. Remove. Prove.

Find

Identify the specific information a model has learned about individuals, ensuring clarity in data retention.

Remove

Erase the identified data while maintaining model performance, providing a clear path for compliance verification.

Current Status

Receipt

Production with signed verification.

Engine

Staging for open-weight models.

Adjudication

Regulatory questions remain unresolved.

Testing

August test: corpus-level — not weights, not personal data.

The Proof Step

Performance Insights from August Test

Performance Degradation

The August test revealed that control topics suffered a degradation of **−0.058**, indicating a drop in relevance greater than the erased topic's degradation of **−0.026**.

Impact Analysis

This outcome highlights the necessity of rigorous re-measurement, demonstrating that our erasure process ensures accountability while revealing potential unintended consequences in model performance.

\$50k—500k
per event

Retraining Cost Range

Retraining costs can be **astronomical**, ranging from \$50,000 to \$500,000 per event. This makes our erasure solution a **more viable financial option** for compliance.

30-Day Go/No-Go Plan

Experiment

Conduct an individual-level erasure experiment with performance gates to validate our approach.

Counsel Opinion

Obtain a scoped EU counsel opinion on whether receipt-backed removal complies with Article 17 requirements.

Demand Interviews

Interview 15-20 privacy counsel and DPO services to assess demand for our model erasure solution.

Design Partners

Secure three design partners with open-weight models and EU exposure to collaborate on implementation.

What We're Asking

No capital. Three design partners, one EU data-protection counsel introduction, one named academic.
